Key Achievements

Project **Drive down data centre costs to save £100K p.a. Data centre migration.**
Client Freshnet (Internal Project), NetBenefit
Skills Negotiation, hardware, network, security and ops systems understanding, project management
Responsibilities Negotiate with hosting provider technical requirements, project manage data centre migration, deliver technical requirements maintaining the same service as the previous provider. Managed all aspects of the data centre migration, including team members, and 3rd parties, maintaining a minimum of downtime for the 24/7 applications used by blue-chip companies with a transaction volume in excess of £60m+ pa.

Project **Integrating Carlsberg UK systems into a Freshnet developed CUK online ordering portal**
Client Carlsberg UK, EDS, Mauve Europe
Skills Project management, VB.Net, SQL, T-SQL
Responsibilities Work with clients to design and develop a batch application to receive data from CUK's SAP system, nightly, and update customer account, product and pricing information within the live online ordering database.

Project **Integrate clients ERP and EPOS systems into the Freshnet online ordering portal**
Client Hall & Woodhouse and Zonal Retail Data Systems
Skills BizTalk 2004, C#.Net, XML, FTP
Responsibilities Work with clients to obtain technical requirements, costing, client proposal, project management detail, technical requirements doc.

Project **Integrate a new supplier into the Freshnet online ordering application using EDI**
Client Nation Wilcox, Coastline Produce, Hall & Woodhouse
Skills BizTalk 2004, Covast EDI Accelerator, Covast AS2 Adapter, C#.Net, SQL, T-SQL
Responsibilities Work with clients to gather technical requirements, costing, client proposal, project management. Refactored code, updated methods to be generic and de-skilled the adding of future trading partners by adding database dependant condition logic.

Project **De-skill and implement visibility into BizTalk/Covast application processes, document processes, train staff.**
Client Freshnet (Internal Project)
Skills BizTalk 2004, Covast EDI Accelerator, Covast AS2 Adapter, ASP, javascript, C#.Net, SQL. Articulate at a level understood by less skilled team members the logic and idiosyncrasies of custom built company integration applications

Responsibilities Identify complex business processes and deliver efficiency savings by streamlining, de-skilling and to design and develop web based applications and proactive alerts. Train technical team.

Project **De-skill business processes in order to take on additional, less skilled staff.**

Client Freshnet (Internal Project)

Skills Business process analysis, ASP, javascript, SQL, T-SQL

Responsibilities Analyse business processes and deliver efficiency savings and more robust data entry techniques by streamlining, de-skilling and to design, develop and deliver web based applications. Train Db Support Analysis assistant.

Project **Drive down data centre costs to save a further £50K p.a. Data centre migration.**

Client Freshnet (Internal Project), NetBenefit

Skills Negotiation, hardware, network, security and ops systems understanding, project management

Responsibilities Negotiate with hosting provider technical changes, project manage data centre migration, deliver technical requirements maintaining redundancy, disaster recovery and scalability

Project **Data centre migration to add further redundancy, disaster recovery, multi honed communication routes, load balancing and SQL clustering.**

Client Carlsberg UK, Mauve Europe

Skills Project management

Responsibilities Project management, data migration

Project **Build and configure SBS 2003 Intranet Network**

Client Freshnet (Internal Project)

Skills SBS2003, IIS, Exchange, Sharepoint, ASP, .Net, SQL, Active Directory

Responsibilities Analysed business requirements, managed and implemented the whole process.

Project **Build and configure Integration/EDI test and development environments**

Client Freshnet (Internal Project)

Skills BizTalk 2004, Covast EDI Accelerator, Covast AS2 Adapter, C#.Net, SQL, T-SQL, Win Server 2K3, AD

Responsibilities Analysed business requirements, managed and implemented the whole process.

Project **Integrate clients accounting system into the Freshnet online ordering portal**

Client Hall & Woodhouse and QAD MFGPro

Skills ASP, IIS, EDI, Business Analysis

Responsibilities Worked with client and 3rd party software provider to obtain technical requirements, costing, client proposal, project management, technical requirements doc.

Project	Increase visibility of the complex data structures in the online ordering system
Client	Freshnet (Internal Project)
Skills	ASP, SQL, IIS
Responsibilities	Identified the need, designed, developed and delivered products solely responsible throughout the product lifecycle.
Project	Develop a reporting/management tool to administer Freshnets complex retro/discount business model
Client	Freshnet (Internal Project)
Skills	ASP, SQL, IIS
Responsibilities	Analysed business requirements, designed, developed and delivered the product and was solely responsible throughout the product lifecycle.
Project	Develop a Customer Relations Management system
Client	Freshnet (Internal Project)
Skills	ASP, SQL, IIS
Responsibilities	Worked with remote sales team and directors to produce an intuitive system for monitoring sales and potential customer activity, based on the sales funnel technique
Project	Develop an online replacement for a desktop based proprietary application for controlling fresh food produce input prices
Client	Freshnet (Internal Project), Mango
Skills	Design, architect and describe business processes
Responsibilities	Technical contact between Freshnet and the company contracted to develop the application.
